A group of private investors announced a \$100 million solar project Thursday that they claim will be the largest ever proposed in the Northwest.

The Teanaway Solar Reserve, to be built roughly 80 miles east of Seattle, will generate enough electricity to power roughly 45,000 homes. Solar panels will take up approximately 60 acres of the 400-acre site.

Privately-held Teanaway Solar Reserve LLC leased land for the development from American Forest Holdings

LLC.

Construction on the 400-acre project could begin as early as spring and be completed in the fall of 2011.
